

In the Specification:

Please substitute the following paragraphs for the corresponding paragraphs beginning at the indicated location in the specification as originally filed.

(Page 5, lines 21+)

The controller 16 is connected to a memory 17, a main controller 20, ~~not shown~~, and the two-level switch 4. The memory 17 stores settings for call reception vibration mode and call reception sound mode. When a call reception signal is received from the main controller 20, the controller 16 energizes the first circuit 14 when the setting for vibration mode is provided, and the second circuit 15 when the setting for sound mode is provided.
